

AccountFlow — User Guide

An accounting robot. Photograph the paper, the robot prepares, you just confirm.

Download & install

- 1 Open the download page
- 2 Download AccountFlow.zip
- 3 Unzip and double-click AccountFlow.exe
- 4 First run: «More info» → «Run anyway»

You install nothing — Python and OCR are already bundled.

Login

Your administrator gives you your username and password.

The program asks for username and password at startup.

Country selection

Pick your country in Settings — the program adapts currency, VAT rates and chart of accounts.

Daily work — in short

- 1 Paper invoice: photograph (QR → camera) or scan
- 2 e-invoice/email: arrives by itself
- 3 Robot: reads (OCR), suggests the account → «In progress»
- 4 Confirm: F11 → posted
